#### Currency Converter

This currency converter is provided for your convenience, to help you estimate your costs. When you place your order, you will be billed in US Dollars. Actual currency conversion will be handled by your credit card company when we bill your invoice.

#### Deposit Required:

Due to the labor involved with scanning, a 50% deposit is required at the time you place your order, which we will bill to the credit card number you supply. The remainder is due upon completion of the job.

We must use a significant amount of materials to scan 8x10 and larger film. Therefore, we have a minimum scan charge of \$49.95 per image for 8x10 or larger film. This charge does not apply to 6x17cm or 6x12cm panos. [Please contact us](#) for custom pricing if you have a large quantity of large film you need us to scan.

\*Quantity Discounts only apply to "scan-only" jobs. It does not apply to Archive Scans and print orders. These discounts apply to the total number of transparencies or negatives included within ONE order. While we will work to complete your order as promptly as possible, there is no guaranteed turnaround time for scans with quantity discounts. If you need your order by a specific date, discounted pricing will not apply to your order. Quantity discounts may not be combined with sales or with any other offers. Quantity discounts apply to scans made from 35mm film, medium format film (645 to 6x17) and 4x5 images. 8x10 images do not qualify for quantity discounts. The quantity scan discounts listed above only apply to scans 100mb or larger - please [contact us](#) if you would like to scan a large number of images under 100mb. **To qualify for quantity discounts, you must write the words "Quantity Discount" in the promotional code section of the order form. Orders without these words will be billed at our regular pricing.**
